by Multiroir
Lobrot

Depuis 1898

FIRST OF ALL

LOBROT by Multiroir is the result of the merger of the CHR / HORECA activities of the Lobrot and Multiroir companies.

Lobrot was founded in 1898 and has developed genuine expertise in the fields of sieving, woodcraft, and polyethylene board cutting. Lobrot has always prioritized product quality for its professional clients in the CHR and foodservice industries.

As for Multiroir, since its establishment in 1957, it has developed a CHR product range focused on storage and handling equipment.

The merger of the two companies led to the creation of a new brand and a new entity entirely dedicated to serving its professional clients.

The expertise of both entities in highly specialized fields converges into a unique product offering on the market.

Thus, LOBROT by Multiroir is able to provide products of very high quality at the best price.

- Wood fiber boards
- Wood boards for foodservice and CHR
- Standard and custom PEHD 500 boards
- Kitchen utensils in wood, stainless steel
- Display cases
- Gastronorm containers
- Food storage equipment
- Glass racks
- Dish racks
- Versatile trolleys

CHR

ECO-RESPONSIBLE COMMITMENTS

OUR OFFICIAL LABELS & LOGOS

**ENVOL
LABEL**

Our company is proud to hold the ENVOL label, a certification recognizing our commitment to eco-responsibility.

This attests to our efforts to minimize our environmental impact while ensuring quality products and services.

**PEFC
LABEL**

Multiroir has committed to producing its catalog exclusively with professionals affiliated with PEFC France.

This commitment guarantees that our catalog comes from responsible sources, and we are dedicated to the preservation of forests in France and around the world.

OUR ACTIONS

Recyclable Products

Every product we design or select is carefully considered to integrate into the virtuous recycling cycle at the end of its life.

Our commitment to the circular economy reflects our determined vision to actively contribute to waste reduction.

Responsible Packaging

We are committed to favoring environmentally friendly packaging, prioritizing recyclability and biodegradability.

We minimize the use of unnecessary materials. As a result, every product becomes a concrete contribution to preserving our planet.

Sustainable Materials

We make a conscious effort to select materials derived from renewable and recycled resources.

This approach goes beyond simply reducing our ecological footprint; it reflects our constant pursuit of innovative and eco-responsible solutions without compromising the quality of our products.

BECOME A PARTNER !

A dedicated personalized offer

Expand your offer

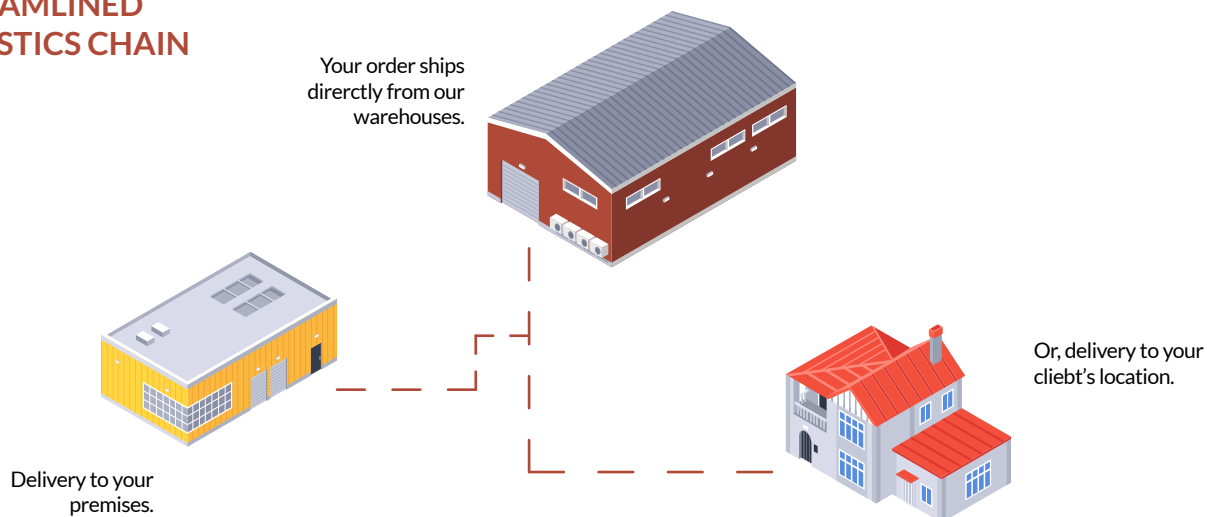

- Access a range of over 3,000 products.
- Enjoy competitive pricing to always deliver better service to your clients.
- Introduce new products each year.
- Rely on a dedicated sales team to meet your specific needs.

Delivery terms

- Products stored in France for maximum responsiveness.
- Free shipping for orders over €500 (excl. VAT).
- No minimum order requirement.

STREAMLINED LOGISTICS CHAIN

OUR BRANDS

Multiroir.com

Multiroir offers professionals a comprehensive range of storage, organization, and packaging products, including boxes, drawers, bins, and plastic cases.

Mdose.fr

Mdose, the medical division of the group, meets the logistical needs of healthcare facilities (hospitals, clinics, pharmacies, nursing homes, etc.) in terms of medical logistics.

Multibac.com

With 40 years of experience in the plastic industry, Multibac offers professionals across all sectors equipment such as pallet boxes, pallets, and plastic bins, directly sourced from the factories.

Marketing support and sales tools for the HORECA sector

We provide you with informational materials that highlight the benefits of our products in the specific work environments of the HORECA (Hotel, Restaurant, Catering) sector.

DISCOVER OUR FULL RANGE
ON OUR WEBSITE.

The high-density polyethylene (HDPE) cutting board is used by the most demanding professionals for its hardness and hygiene properties. Polyethylene resists choppers, knives, and other kitchen tools while preserving their sharpness.

At Lobrot, we have been transforming polyethylene for over 30 years, working specifically with HDPE 500 through thermo-compression. This material has the longest lifespan, the highest resistance to abrasion, and offers maximum rigidity, making it the ideal choice for professional kitchens.

The Lobrot range includes both standard sizes and custom cutting options.

This range is available in various colors, allowing for personalized cutting boards tailored to each user's needs.

For any requirements related to changing work surfaces, cutting boards, or customized setups, feel free to contact us at info@lobrot.com or by phone at 01 45 10 15 20.

The prices per square meter are valid for dimensions ranging from 400 x 300 mm to 2000 x 1220 mm.

For any other dimensions, please request a personalized quote from our sales department.

- HDPE 500 Material.
- 30 sizes - 6 colors.
- Compliant with HACCP standards, food contact approved.
- Temperature resistance up to 80°C.
- Excellent friction and non-stick properties.
- High abrasion resistance and chemical inertness.
- Great resistance to shocks and wear.
- No moisture retention.

CUSTOM CUTTING BOARDS

- HDPE 500 Material - Right Angles - Chamfered Edges and Corners.
- Optional: grooves, juice pockets, anti-slip feet, display boards, etc.
- Prices are valid for dimensions up to 200 cm; for larger sizes, please contact us.

The beechwood tray stand is an essential tool for all catering professionals. It facilitates service in cafes, bars, and restaurants.

Durable thanks to its wooden structure and nylon straps, the tray stand is foldable, allowing for easy storage.

- Height: 96 cm (105 cm when folded).
- Length : 47 cm.
- Width : 43 cm.
- Material : beechwood.
- Color : dark brown.

- The nylon straps with non-slip rubber rods on each side ensure the trays are securely held in place, preventing slipping or falling.

- The limitation of the opening through the straps prevents the tray stand from opening too widely, which could cause accidents or spills during use.

- The screw joints allow for adjustment and a firm hold, reducing the risk of tipping during service. Additionally, the screws can be tightened or replaced.

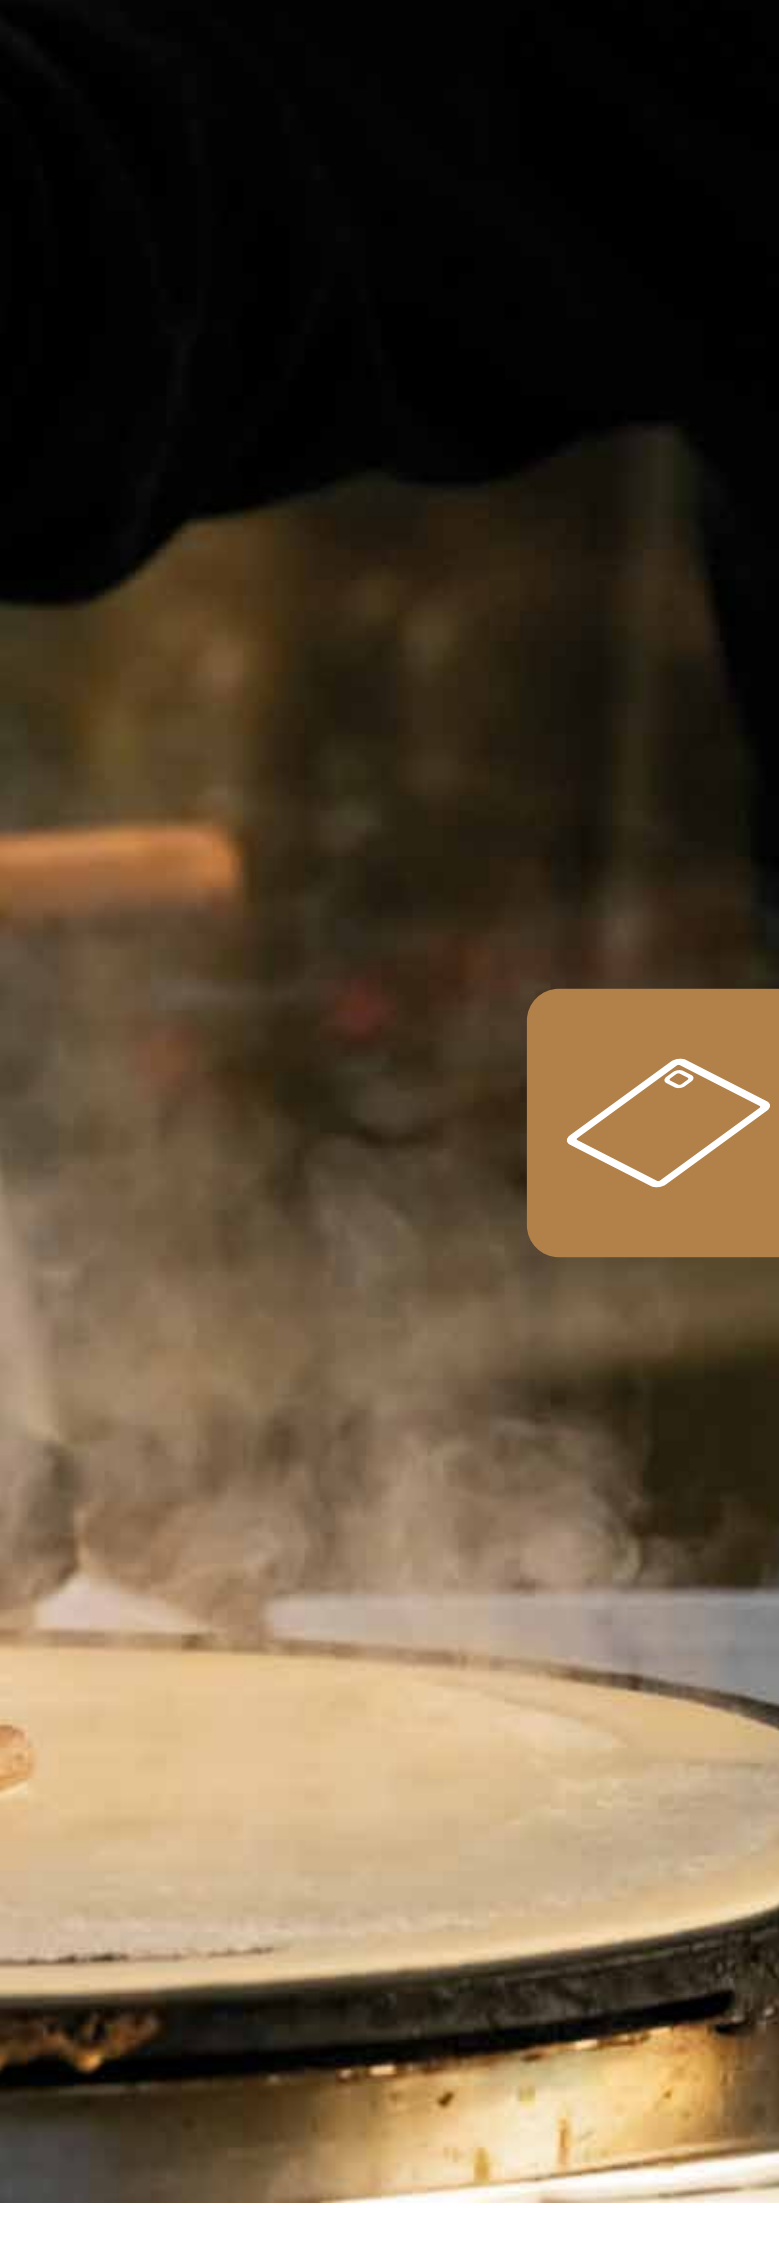

- By choosing a reinforced base, Lobrot has made the decision to offer equipment that can withstand frequent and prolonged use in hospitality establishments.

WOOD FIBER CUTTING BOARDS

You won't be able to do without it!

This innovative cutting board is made from recycled wood fibers that are then compressed, a manufacturing process that minimizes environmental impact by recycling wood waste. The resulting wood fiber is non-porous and particularly durable, making it a hygienic, scratch-resistant material that is dishwasher safe and does not alter the taste of food.

Perfect for a cutting board!

Wood fiber boards

32

FIND THE FULL RANGE ON
OUR WEBSITE.

Our wood fiber cutting boards are made from layers of paper that are stacked and then compressed to create the final product. The material for our cutting boards comes from sustainably managed forests.

This wood fiber is non-porous and particularly durable, making it a hygienic, scratch- and stain-resistant material that does not alter the taste of food. The manufacturing process of this material minimizes environmental impact by recycling waste.

Lightweight and easy to handle due to their thinness, their extremely dense material makes them very strong. They can be used as trivets, as they can withstand temperatures up to 176°C, as well as serving boards.

All our models are dishwasher safe.

SLATE EFFECT WOOD FIBER CUTTING BOARDS

Thin and elegant, the slate-colored wood fiber cutting boards are made with the utmost respect for the environment. They are ideal for food preparation and product presentation.

- Slate color.
- Wood from sustainably managed forests.
- Hygienic and easy to maintain.
- Does not dull knives.
- Dishwasher safe.

DISPLAY CASES

Lobrot offers a wide selection of display cases suitable for food contact.

This product can be used in all types of businesses, serving a dual purpose: showcasing and protecting products.

Our protective display cases are made from plexiglass (PMMA) and are delivered shrink-wrapped, ready to be installed.

We design many food display solutions and invite you to explore our range of standard and customizable protective display cases below

Flat top return	36
Inclined top return	37

FIND THE FULL RANGE ON
OUR WEBSITE.

An ideal solution for selling your food products, as well as displaying pastries, cheeses, and more.

Commonly used as a cake display, its transparent plexiglass allows for continuous viewing of the food while offering great resistance to shocks.

Very easy to clean: washable with hot water and a sponge.

Two models available: inclined and flat, allowing additional items to be placed on top of the display, or with a top return for better visibility.

GASTRONORM

Our display dishes are ideal for showcasing the creations of professionals in the food industry. These are food-grade plexiglass (PMMA) dishes designed to withstand temperatures ranging from -20°C to +80°C.

This thermal resistance makes them perfect for industrial washing and storage in freezers.

Stainless steel gastronorm pans	40
Polypropylene gastronorm pans	42
GN container with front opening	44
iosthermes EPP containers	45
Plexi trays in gastronorm size	46

FIND THE FULL RANGE ON
OUR WEBSITE.

We offer a complete range of stainless steel pans compatible with gastronorm formats GN 1/1, 1/2, 1/3, 1/4, 1/6, and 1/9. These pans are designed for professional use in both hot and cold environments.

Our stainless steel GN pans are suitable for all uses, including food preparation, cooking, reheating, freezing, serving, and even storing and preserving food products.

They are compatible with any support or equipment that fits the gastronorm (GN) format, such as saladettes, ovens, bain-maries, holding cabinets, sinks, refrigerators, trolleys, and storage systems.

AISI 201 stainless steel is perfectly suited for the foodservice industry (CHR) and offers many advantages: durability, hygiene, and excellent value for money. It is highly resistant to corrosion.

The material thickness of 0.5 mm offers the following advantages:

- Quality and durability similar to thicker pans.
- Lightweight pans for easy handling.
- A more economical and environmentally friendly solution.

Each piece is individually inspected and packaged to protect the surface and ensure perfect hygiene.

- AISI 201 stainless steel.
- Compatible with GASTRO formats.
- Operating temperatures: -50°C to +280°C.
- Dishwasher safe.
- Very good stability.
- Lid with handle.
- Food contact approved.
- Stackable when empty.

- This container is perfectly suited for transporting GN 1/1 gastronorm pans. It is both lightweight and highly durable, as it is made from ABS material.

Practical to use thanks to its front opening and removable door.

The front-opening container is stackable and equipped with a secure locking mechanism, ensuring the safe delivery of food products.

It features 12 rails, allowing for various configurations based on the height of GN 1/1 pans.

- Dimensions : 410 x 590 x H590 mm.
- Weight : 8,9 kg.
- Volume : 60 liters
- Operating temperatures : -40 °C to +100°C.
- Compatible with industrial dishwashers.
- Food-contact safe.
- Stackable.
- Reinforced ergonomic handles for a comfortable grip.
- Removable hinged door.
- Highly stable during use.
- Color : Dark gray.
- Removable silicone seal for easy cleaning.
- Pieces per package : 1

G600

The EPP insulated containers are the perfect solution for the secure transportation of food items. Thanks to their exceptional insulating power, they help maintain food at the desired temperature, whether frozen, cold, or hot, throughout their journey.

They are made from high-density expanded polypropylene (EPP), a material known for its durability and lightness. The insulated containers are therefore very sturdy and can be easily handled, even when full. They are also stackable, making storage and transportation more convenient.

The Isotherm «EPP» containers are compatible with the GN 1/1 gastronorm format and can accommodate GN containers made of plastic or stainless steel.

The material has excellent insulating properties and can maintain food at temperatures ranging from -40°C to 120°C. As long as the boxes remain closed and are

filled to more than 75%, the temperature will only drop by 1°C or 2°C per hour.

All the boxes are safe for direct contact with food, making them ideal for storage in dry or cold environments (freezers, refrigerators).

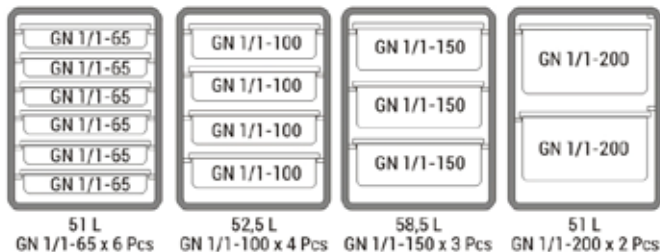

At the end of their lifecycle, all the boxes can be fully recycled.

- In GN 1/1 format.
- Lightweight and highly robust, made from expanded polypropylene (EPP).
- Ergonomic handles for easy transport.
- Absorbs flavors and odors.
- Resistant to acids.
- Hygienic and easy to clean.
- Food contact safe.
- Hermetically sealing lid.
- Stackable.
- Excellent insulating properties.
- Color : Black.

TCB-200EPP

Available in white or black, our plexiglass trays in gastronorm format are practical, versatile, and durable tools designed to meet the needs of professionals in the foodservice industry. Adhering to the gastronorm format ensures compatibility with existing professional kitchen equipment, making it easier to store, prepare, and serve food.

These trays are resistant to impacts and temperature variations ranging from -40°C to +70°C, making them suitable for both hot and cold food. They can also be safely placed in a freezer, offering more flexibility for food storage.

The trays feature smooth, non-porous walls, ideal for product and dish presentation as well as cleaning. Additionally, they can be safely washed in a dishwasher without warping, an important factor in maintaining the strict hygiene standards required in the CHR sector.

PLATES IN PLEXIGLASS

- High quality, unalterable, shiny and smooth.
- Specially designed for food contact.

GLASS RACKS

Discover our range of modular storage, stacking, and transport bins for glasses and plates.

MULTI-RACK Dish Racks	50
Glass racks with solid & perforated sides	52
Accessories for glass racks	53

FIND THE COMPLETE RANGE
ON OUR WEBSITE.

The MULTI-RACK range from Lobrot is a complete solution for dishwashing, transportation, and storage of dishes.

This next-generation range combines robustness and longevity performance.

It is designed to accommodate all types of glasses, plates, cups, trays, cutlery, and accessories.

Ergonomics have been carefully considered, with rounded shapes, easy-to-grip handles that won't hurt your fingers.

The perforated sides are specially designed to ensure deep cleaning and optimal drying.

The Multi-Rack glass washing racks are made from recyclable polypropylene and are resistant to both cold and heat.

The gray bases feature a double wall, providing the product with stability and durability. Glasses are thus washed, transported, and stored safely. The blue extensions easily and permanently attach to the bases, allowing adjustment to the height of the glasses.

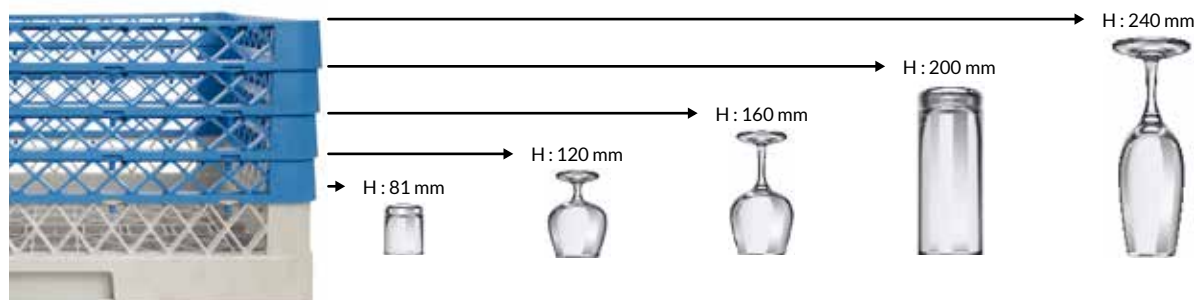

Many accessories complement the range, such as trolleys, cutlery holders, clips, etc.

- Material : Recyclable PP.
- Material resistant to chemicals and shocks.
- Food contact standard.
- Operating temperature : -40°C to +70°C.
- Optimal drying with little or no wiping required.
- Modular, practical and ergonomic system.

The bases and extensions are delivered separately and can be easily assembled without tools.

HOW TO CHOOSE THE NUMBER OF EXTENSIONS?

In order to choose the number of extensions needed for the transportation and storage of your glasses, it is essential to know their height. Once you have this information, you can refer to the diagram below:

HOW TO CHOOSE YOUR BASE ACCORDING TO THE DIAMETER OF YOUR GLASSES ?

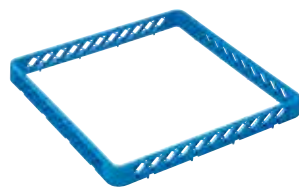

To determine the rack and extension model you need for transporting your glasses, you must measure the widest part of your glass. This could be the foot, the body, or the top of the glass.

Next to each photo, you will find the icon () followed by the maximum diameter accepted by the model.

REMOVABLE DIVIDERS FOR EUROLINE BINS

The removable dividers are made of thick PP (polypropylene), making them very durable.

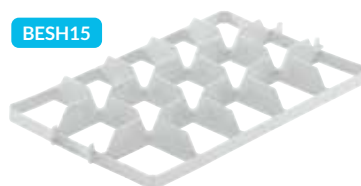

They allow for compartmentalizing Euro bins with solid or perforated sides in the 600 x 400 format.

They are very practical, especially for the transport of glasses and dishes.

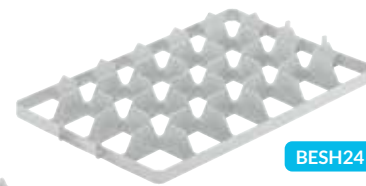

The «LOW» dividers fit perfectly and freely at the bottom of the bins.

The «HIGH» dividers fit into the handles..

BINS

BECOBX TAPERED BINS - RECYCLED PP

The ECO series of Multiroir tapered bins is designed for the storage and organization of all types of products.

Affordable with unbeatable prices on the market, this range is also eco-friendly, as it is made from recycled plastic.

The material used is PP, which provides high rigidity and impact resistance.

All the bins can be stacked for storage and also nested into each other to save on storage costs and space during transportation.

- Material : Recycled PP
- Hanging hook on the back of the bins for rail use.
- Operating temperature: -30°C to +70°C
- Integrated label holder (labels not provided).

BACS

TAPERED BINS - MLT

The plastic tapered bins from the MLT series are designed to optimize storage, organization, and picking in all industries. They can be stacked on a workbench or placed on shelves. The front opening of the bin allows for quick visibility of the contents and makes it easier to access the products.

- Material : polypropylene.
- Operating temperature : -30°C to +60°C.
- Colors : blue, red translucent.
- Food contact quality for the red and translucent models.
- Hygienic due to smooth internal walls.
- Durable with reinforcements on the bottom and sides of the bin.
- Very stable when stacked.
- Label holder for product identification.
- Grooved bottom for easier handling of small parts.
- Grip handle on the front of the bin for easy access.
- Recyclable material after sorting.

Lobrot's plastic tapered bins have excellent mechanical, chemical, and physical properties.

- Resistance to most acids and chemical agents.
- Resistance to breakage and shocks.
- Resistance to extreme temperatures (from -30° to +60°).
- Resistance to shape aging.

Lobrot offers a comprehensive range of Euro-norm bins with solid sides for professionals.

The EUROLINE range is compatible with all European standard containers, including Euro pallets.

It allows for the storage, transport, and supply of goods or food products. It is suitable for both manual and automated use, indoors or outdoors.

The stacking capacity ranges from 15 kg to 35 kg.

- Made from thick polypropylene, it is therefore rigid and very durable.
- Great stability thanks to the reinforced frame.
- Operating temperatures : -20°C to + 50°C.
- Resistant to acids and bases, cold and heat.
- Available in standard sizes : 200x150, 300x200, 400x300, 600x400 and 800x600.
- Food contact compatible.
- Ergonomic handles for optimal handling.
- Smooth walls for easy cleaning.
- Custom markings available upon request.
- 100 % recyclable.
- Color : Gray 401.
- See available accessories on page 53.

The EUROLINE bin with perforated sides is compatible with all European standard containers, including Euro pallets.

Made from copolymer polypropylene, it is both lightweight and durable thanks to its design and reinforced frame. It is suitable for the transport and storage of goods and food products.

The perforated sides facilitate air circulation and prevent the accumulation of moisture.

- Material: Copolymer polypropylene.
- Great stacking stability.
- Operating temperatures: -20°C to +50°C
- Available in sizes 400x300 and 600x400.
- Available in sizes 400x300 and 600x400.
- Food contact compatible.
- Ergonomic handles for optimal handling.
- Custom markings available upon request.
- 100% recyclable.
- Color: Gray 401.
- See available accessories on page 53

The translucent Euroline series is unique on the market! A range of 10 references of translucent Euro bins that allow for quick visibility of the contents at a glance.

This series maintains the same characteristics of lightness and durability as the professional Euro bins. It is compatible with all European standard containers, including Euro pallets.

Made from copolymer polypropylene, the translucent bins are suitable for the transport and storage of goods and food products.

- Material : Copolymer polypropylene.
- Great stacking stability.
- Operating temperatures : -20°C to +50°C.
- Résistant to acids and bases, cold and heat.
- Available in sizes 200x150, 300x200, 400x300 et 600x400.
- Food contact compatible.
- Ergonomic handles for optimal handling.
- 100% recyclable.
- Color natural translucent.
- Many accessories available.

The stackable and nestable bins can be stacked and/or nested by simply flipping them over.

These bins combine the durability of Euro stackable bins with the reduced volume of distribution bins, as they can be nested inside each other. They are particularly appreciated for all logistical operations that require return or empty storage. Once stacked, it is possible to save between 50% and 80% of storage volume.

- Material : Thick recyclable polypropylene.
- Dimensions : 600x400, European standard.
- Rigidity : Stacking capacity up to 150 kg.
- Resistance : Resistant to chemical agents and temperature variations
- Durability : Strengthened by a honeycomb bottom.
- Ergonomics : Open handles for easy handling
- Nestable : Can be nested up to 78% to maximize empty volume storage.

Designed to offer exceptional manufacturing quality, these bins are praised for their ease of use, making them a popular solution across various professional sectors.

Combining ecology and economy, these reusable bins are made from nearly unbreakable polypropylene and meet European standards. Their silent and effortless folding mechanism, along with an active locking system during deployment, ensures easy and secure handling.

Material : Nearly unbreakable polypropylene. Compatible with European standards.

The panels fold and unfold very easily, silently, and effortlessly.

Active locking system secures the container when unfolded.

Robust construction ensures perfect protection of the products.

FOOD BOXES

CRYSTAL BOXES

The Crystal Box range consists of five high-quality models with perfect transparency. Each model has a material thickness between 3 and 4 mm. Manufactured through plastic injection using PMMA material, the Crystal Boxes show no signs of folding or gluing.

These plexiglass boxes are premium products with an elegant design and clean lines, perfect for showcasing your items.

Each model is individually packaged in a PE (polyethylene) bag.

- 5 different standard models.
- Hinged lids with attached hinges.
- Customization available upon request and for large quantities.
- Food-contact safe quality.
- Perfect transparency of the boxes.

FOOD BOXES

The MULTIBOX containers are practical, high-quality, and versatile plastic boxes. They are perfect for organizing, storing, and transporting products, as well as food items.

Made from virgin polypropylene (PP), they are food-contact safe. They provide both security and ergonomics during storage and transport. The lids are securely held in place by the side handles.

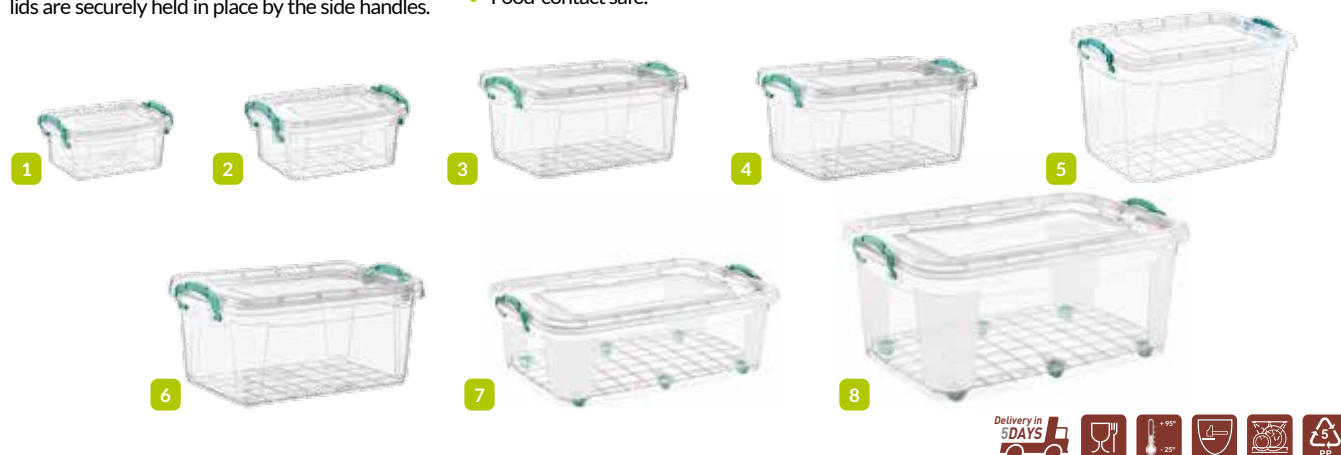

STORAGE BOXES - MULTIBOX

The flat bases of the boxes and lids ensure perfect stability when stacking.

The transparent material allows for easy visibility of the contents.

- Smooth walls, reinforced honeycomb-patterned base.
- Food-contact safe.

- Usage temperature range: -25°C to +95°C.
- Stackable with the lid and nestable when empty.
- Saves 90% space when empty.
- Secure closure with clip-on side handles.
- Dishwasher safe.

FOOD BOXES

AIRTIGHT CONTAINERS - SMARTSTORE™ DRY

Storage conditions are not always easy, especially in humid environments like outdoors, basements, or attics.

The SmartStore™ Dry provide the ideal storage solution; they are designed to withstand the toughest conditions, both indoors and outdoors. Fully sealed, they become waterproof, preventing moisture, dust, and insects from reaching your products inside.

- Perfect sealing (IP64 / IP44 standards).
- Nestable & stackable.
- Resistant to temperature variations (-40°C / +70°C).
- Food-contact safe.

BOÎTES ALIMENTAIRES

STORAGE BOXES - BASICBOX

The BASICBOX storage boxes are ideal for storing and organizing all types of products.

Made from a highly impact-resistant material, they combine lightness, transparency, and ergonomics. The transparent material allows for easy identification of contents.

The lid is secured with two clips located on each side of the box.

The boxes stack on top of each other in a stable and secure manner. The rounded, reinforced corners ensure safety and comfort

during use.

- Made from recyclable polypropylene.
- Food-contact safe.
- Easy handling with two ergonomic side handles.
- Transparent/translucent color.
- Excellent stacking stability.
- Usage temperature range: -20°C to +100°C.

TROLLEYS

This range of stainless steel trolleys is designed to meet the needs of businesses and the foodservice industry. Made from 201 stainless steel alloy, these trolleys provide users with durability and strength during transport. Stainless steel ensures impeccable hygiene and easy long-term cleaning.

The service trolleys are equipped with four swivel wheels with ball bearings, two

of which have brakes, providing effortless maneuverability, even in tight or hard-to-reach spaces. The handles on each side offer ergonomic design and ease of use.

The range includes two sizes of stainless steel trolleys, each available in 2-shelf and 3-shelf versions. Each shelf is equipped with a foam plate to reduce noise.

- Material: AISI 201 stainless steel.
- Lightweight and excellent maneuverability.
- Tube thickness : 0.7 mm.
- 2 push handles.
- 4 swivel wheels with a diameter of 100 mm, 2 with brakes.
- TPR wheel system: noise-reducing thermoplastic.
- 4 corner bumpers.
- Delivered as a kit - easy to assemble.

Optimize the organization of your kitchen, bar, or storage area with our EURO standard steel bin racks. Specifically designed for foodservice and hospitality professionals, this rack system is easy to install and features quick assembly.

It allows for the storage of EURO 600 x 400 bins of various heights on sliding tracks, providing a practical solution for organizing your ingredients, supplies, and equipment.

The robust steel structure ensures optimal strength and can accommodate heavy loads, meeting the storage needs of professionals.

Other dimensions
available upon
request.

- Full upper shelf with bolting to protect the contents from dust and other elements that could damage them.
- Rails without rear stops and a structure without crossbars, allowing for loading from the rear and unloading from the front with a maximum load of 35 kg.
- The base is compatible with 600x400 and 400x300 formats to accommodate the bins.
- Adjustable rail system with 25 mm increments, optimizing the position based on the height of the bins.
- High-quality chrome-plated steel tubes.

Meaning of Acronyms :

HACCP

HACCP Protocol is an analysis method aimed at ensuring food safety.

Based on 7 principles, the implementation of HACCP follows a logical sequence of 12 steps, including hazard analysis and the identification of critical control points for their management.

HACCP focuses on the 3 categories of hazards for food hygiene:

- Biological Hazards (viruses, bacteria, etc.)
- Chemical Hazards (pesticides, additives, etc.)
- Physical Hazards (wood, glass, etc.)

The PEFC (Programme for the Endorsement of Forest Certification) certification guarantees the sustainable management of forests and the respect of their environmental, societal, and economic functions. It ensures the application of strict rules by all forest stakeholders (owners, operators, and forestry contractors).

The FSC (Forest Stewardship Council) certification is a tool, based on market requirements, aimed at promoting responsible forest management worldwide. Products from FSC-certified forests are monitored from their origin, throughout the manufacturing process, and up to their distribution. The FSC label ensures that the products used come from controlled resources that are harvested responsibly.

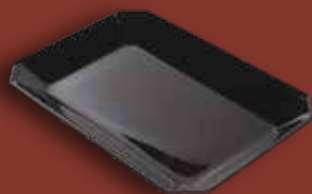

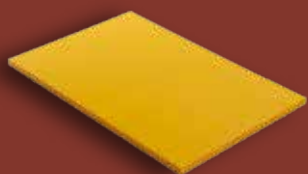

The Möbius strip (also known as a loop, ring, or ribbon) is the universal symbol for recyclable materials, and has been used as such since 1970. Now widely recognized, it serves to identify a product as recyclable.

If the circle includes a percentage in the center, its meaning changes entirely. The percentage indicates that the item or packaging contains a certain amount of recycled materials.

It must be placed on all recyclable packaging and products, except glass containers. It signifies that the product is recyclable.

Symbolically, the shape demonstrates civic action: the three arrows represent sorting, and the circular arrow embodies recycling.
